

Business Process Improvement Unparalleled Customer Satisfaction

LEAN SIX SIGMA & CONTINUOUS IMPROVEMENT

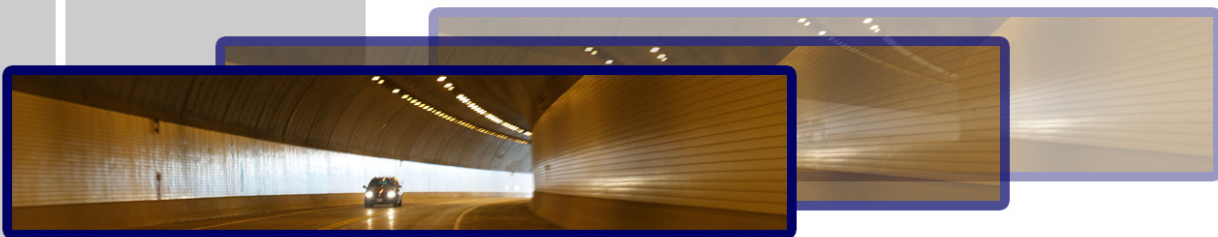

THE XPeZY TEAM BRINGS THE PRAGMATIC - rather than dogmatic - LEAN Six Sigma methodologies to help our clients achieve significant business process improvement in transactional and manufacturing environments, resulting in substantial cost reduction, increased efficiency and profitability, and unprecedented customer satisfaction levels.

FOCUSED ON IMMEDIATE YET SUSTAINABLE BUSINESS PROCESS IMPROVEMENT, our team works together with our clients' executive teams to identify process re-engineering opportunities, optimized resource allocation, new, creative ideas to further improve and enhance existing products and services, and ways to strategically align the business goals and strategies to the *Voice of Customer*.

SIX SIGMA DEPLOYMENT

OUR PRACTICE ASSISTS OUR CLIENTS BECOME SIX SIGMA ORGANIZATIONS through Six Sigma Deployment: planning, readiness assessment, infrastructure design and build, support system, training and certification of client resources, and cultural adjustments.

www.XPeZY.com

A SUCCESSFUL SIX SIGMA DEPLOYMENT ensures that our clients will achieve process excellence independently, while incorporating other Six Sigma components: continuous improvement initiatives, DFSS, LEAN, and Kaizen.
