

# A Balanced Approach Between Cost Cutting & Growth

## TURNAROUND STRATEGIES

**RECOGNIZING THE URGENCY** behind each of our clients' restructuring initiatives, as well as the need for durable, stable solutions, the XPeZY Team is keen on discovering, recommending and implementing the strategies that work best for each client, in a customer-centric, quality-focused culture of excellence.

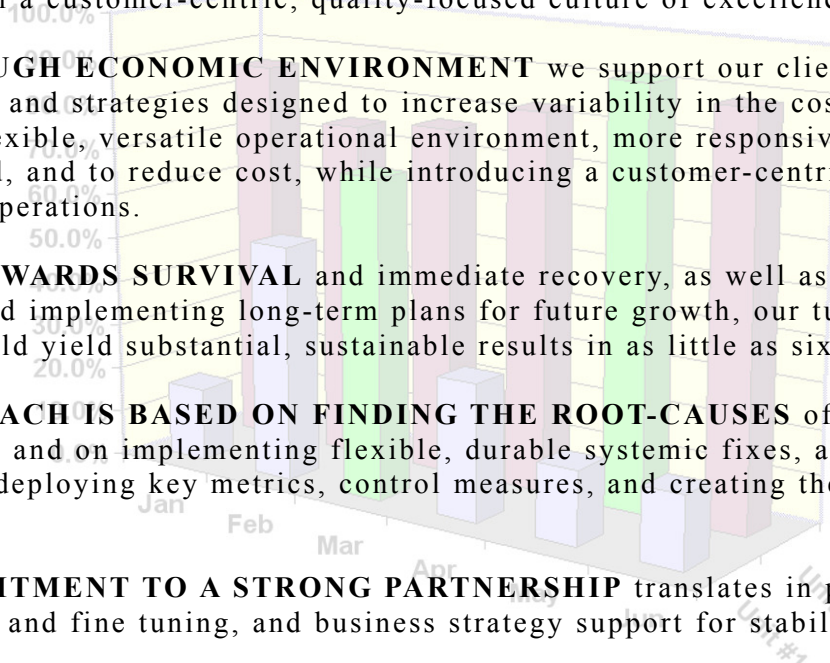

**IN THIS TOUGH ECONOMIC ENVIRONMENT** we support our clients with an array of tools and strategies designed to increase variability in the cost structure, to create a flexible, versatile operational environment, more responsive to a non-linear demand, and to reduce cost, while introducing a customer-centric emphasis to everyday operations.

**GEARED TOWARDS SURVIVAL** and immediate recovery, as well as laying the foundation and implementing long-term plans for future growth, our turnaround strategies could yield substantial, sustainable results in as little as six months.

**OUR APPROACH IS BASED ON FINDING THE ROOT-CAUSES** of the operational failure, and on implementing flexible, durable systemic fixes, augmented by defining and deploying key metrics, control measures, and creating the proper documentation.

**OUR COMMITMENT TO A STRONG PARTNERSHIP** translates in post turnaround audits and fine tuning, and business strategy support for stabilization and growth.

**THE XPeZY TEAM** will readily provide post turnaround training needs assessment and delivery, thus helping the organization adjust to this complex change and lead it successfully. Our goal is our clients' sustainable stability and growth.
